

# Fire Followers Tour at Sedgwick Reserve

Saturday, April 4<sup>th</sup> 9:30AM-3:30PM

*Join Sedgwick Reserve and the La Kretz Research Center at Sedgwick for a Fire Followers Tour and explore how local landscapes respond to fire. We'll visit a series of prescribed burn sites from the past four years, along with an area affected by the 2024 Lake Fire, offering a rare opportunity to see different kinds of fire and stages of regrowth across different natural communities.*

*Participants will travel between sites by car and short walks, observing how native plants, wildlife, and soils recover after fire. Along the way, we'll discuss the role of fire in California ecosystems, how prescribed burns are used as a land management tool, and what these practices mean for resilience in a changing climate. This visit will be attended by researchers, fire practitioners, and the general public.*
